

## **University of Michigan Program For IACUC Review of Exceptions to Regulations, Policies, And Nationally Accepted Standards**

### **Purpose**

Requests for special treatments or procedures that involve exceptions to the *Guide for the Care and Use of Laboratory Animals*, regulations of the Animal Welfare Act, or U-M Animal Care and Use policies must be reviewed and approved by the Institutional Animal Care & Use Committee (see [U-M Program for Reviewing the Housing of Different Species in the Same Room](#) for exclusions).

The need for submission of a [Request for Special Treatment or Procedure Form](#) may be identified during review of a new, renewal, or modified Animal Use Application, or during the course of animal care or use after the application has been approved and initiated.
